

## ***Our new Algebra EOC Review website is 'live'!!***

The task force committee members did a great job in pulling together our review website. Access the review by going to the math home page and clicking on the Algebra EOC Review picture.

<http://www.ecsd-fl.schoolloop.com/Math>

Currently, each benchmark page has the following:

- associated sample problems from the Item Specifications with a page showing the steps of the solution
- one or more video tutorials (To play the videos full screen, you must have an updated version of Flash.) On the home page of the Review site there is an icon for uploading the latest version.
- PDF Reference sheets
- Access to an online calculator
- Correlation to the Glencoe textbook by chapters and benchmark
- Access to the Florida Virtual School practice test
- additional problems will be coming soon

The review site is open for anyone to access - students, teachers, and parents. Please share this information with all of your stakeholders.

Plans are in the works for a Geometry EOC Review site but the new site will not be available until February or March.

The task force brought great suggestions and ideas for this project and I appreciate their expertise. They did an fantastic job in completing the research for finding free video tutorials that correlate to each of the benchmarks. They are still working to find additional problems and will record the solutions to gradually increase the robustness of our site. Please congratulate them on a job well done.
