

ePEP – a resource managed by the Florida Department of Education that allows students to track their academic goals and progress.

Current 9th, 10th, and 11th graders are required to create an ePEP on www.facts.org. Likewise, FL. DOE is requesting that students and parents utilize this valuable web tool. Students who have created an account have a Log In and a Password. They should access their account and create a new Log In and Password that is easy to remember. Student who have NOT created an account have been assigned a Log In and Password by the Department of Education. These students should change their Log In and Password to one that is their own and easy to remember. Current 9th graders received an instruction sheet in home room before school was out regarding this important issue. Other students should see their counselor for more information.
